

# *Environmental Change and Human Adaptation*

With the persistence of environmental change, people across the world are experimenting daily with different adaptive methods on the ground. With support from *National Geographic* and *The Redford Center*, Alizé Carrère has been documenting innovative human adaptations in places such as Madagascar, Bangladesh, Vanuatu, Norway and the U.S. Alizé shares her experiences from the field looking at these unique examples of human adaptation, reminding us of the most important trait that has allowed for our continued survival on earth.

## **Lecture by Alizé Carrère**

*National Geographic Explorer & Filmmaker, PhD Student,  
University of Miami, Abess Center for Ecosystem Science and Policy*

**Monday**  
**December 9**  
**@ 6:30 pm**
